Agenda Section 1

Start: 11:56

Please share thoughts with the Methane TF ¿Qué ideas le gustaría compartir con Methane TF?

duration: 00:47:28

Participant Input

- What public funding opportunities are there for early stage methane capture technologies?
- Methane
- Why can't we see whose here?
- Can the slides be shared?
- Why ignore landfills, dairy's, or cities that has methane vents all over without any regulatory oversight (eg Los Angeles).
- This line all monitoring protocols cannot rely on the impenetrable party to monitor their own work. We've
- Cannot allow Implementing parties to Monti
- Will satellite technologies capture industries other than oil & gas, i.e. landfills & dairies?
- There is also a current methane leak in Playa Vista
- Cannot allow Implementing parties to monitor their own work ?
- When people grade their own tests we know what kind of grades thence earn
- How will CARB ensure that regs are obeyed and pollution abated in a timely fashion?
- There were several questions listed here from listeners, why were they removed?
- 34,000 well site inspections in 2022--how many of those were "desk" inspections?
- Playa Del Rey underground gas storage has been leaking periodically for years.
- Could you tell us more about contractors Cal GEM works with?
- How much does sealing an orphan well cost that ~\$265M cannot address most of them?
- How will calling 911 help protect community members reporting leaks? What resources can they be connected to via 911?
- Where is more specific information about the Oil and Gas Enforcement initiative available?
- Does the orphan well count include previously plugged wells or just active/idle wells?
- Applaud the efforts to address abandoned wells. Very good to see this program. Question- has radon been considered as a
- Almost every night I smell sulfur in the outside air. I live in Salinas, CA 93905.
- Why can't we see whose here?

What else would you like to share here? ¿Qué más le gustaría compartir aquí?
