

Instructions: Please edit the **[bold language]** contained in each bullet point below so the information accurately represents your specific project and location. If additional language not contained in the brackets below is needed, please add an appropriate description for your project.

### Key Considerations Summary (SAMPLE – List Key Considerations)

- Work locations will be accessed using **[operator choose all that apply: existing/regraded/new]** access roads
- New road construction or improvement **[operator choose one: will/will not]** be needed
- The work will occur on **[operator choose all that apply: existing/regraded/new]** well pads
- All equipment **[operator choose one: will/will not]** be staged within the project boundary on existing well pads and access roads
- Grading in undisturbed areas **[operator choose one: will/will not]** occur in any phase of the work
- The work will use **[operator choose one: existing/new]** electrical lines
- The work will involve **[operator choose all that apply: re-use, repair, or re-installation of various above-ground piping to connect well sites to existing infrastructure/new infrastructure and piping/ or a combination of both]**
- New infrastructure **[operator choose one: will/will not]** be constructed as a result of the work
- All waste from the project will be handled per state and county regulations
- This work is designed to support continuation of resource development in the area. **[operator choose one: Yes/No]** additional facilities or equipment **[operator choose one: will/will not]** be required beyond that described in this application
- The zone of completion for the proposed sidetrack **[operator choose all that apply: is/is not a known hydrocarbon zone/is/is not exploratory]**
- The work **[operator choose one: will/will not change the zone of completion or pool]** of any wells
- The work **[operator choose one: will/will not]** result in a change in purpose or capacity of any wells
- The work **[operator choose one: will/will not]** result in a change in well type of any wells
- The proposed sidetrack **[operator choose one: is/is not]** for abandonment purposes only
- The proposed sidetrack **[operator choose one: is/is not]** associated with a UGS Project
- The work **[operator choose one: does/does not]** occur within an artificial island
- The work will comply with updated CalGEM regulations
- There **[operator choose one: are/are not]** sensitive receptors within the project area
- There **[operator choose one: are/are not]** sensitive plant or wildlife species within the project area
