

TABLE OF CONTENTS

Final Program	v
Development of a Period-Dependent Duration Model for California	1
Chih-Hsuan Sung and Norman Abrahamson	
Implications of mHVSr Spatial Variability on Site Response Predictability	13
Javier Ornelas, Chris de la Torre and Jonathan Stewart	
Effect of Focal Mechanism on the Directionality of Horizontal Ground Motion Intensity	29
Eduardo Miranda, Nathan Girmay and Alan Poulos	
Calibration of the Near-surface Seismic Structure in the SCEC Community Velocity Model Version S	49
Kim Olsen and Te-Yang Yeh	
Prediction of Structural Response and Ground Motion using Deep Neural Networks	65
Issac Kwok-Tai Pang, Selim Gunay and Khalid Mosalam	
Inherent Damping During Nonlinear Seismic Response	85
Dennis Bernal	
Seismic Performance of Bridges with Pier Walls	97
William Wang, Jack Moehle and Tracy Becker	
Application of Earthquake Early Warning for Tall Buildings	110
Farid Ghahari
